

Health and Safety Training

WHY?

Employers have a **legal obligation** under the Occupational Health and Safety Act to conduct health and safety training for their employees. That obligation has become even more onerous with the passing of Bill C-45. Failure to meet these obligations cannot only result in legal penalties (e.g. substantial fines and even jail terms), but serious injuries or even fatalities.

HOW?

Having employees attend safety training sessions can be both time consuming and expensive. Why not make it count? STACS has a proven training formula; combining an interactive lecture format, multi-media delivery platform, with real world hands on exercises, thereby ensuring a higher retention rate... and isn't that what it's all about? Better educated employees mean a safer and healthier workplace. This type of environment means improved productivity and employee morale which in turn results in a more profitable organization, with lower compensation costs.

WHERE?

At your site! That makes the training even more cost effective. STACS will train **your people** in **your facility**. We can incorporate your equipment and processes into the curriculum, which makes the experience more relatable for the participant. Attendees learn the information that they need to know and how to incorporate it into their daily routine.

Each attendee is provided a course workbook that will enable them to review the course content anytime after they've attended one of our programs.

All participants who successfully complete a training session will receive either a certificate or wallet card indicating proof of training.

Partial List of Courses

- Fall Prevention and Protection * (CMP 09243)
- Confined Space Entry * (CMP 09242) ^ (STCS 3952)
- Electrical Safety and Arc Flash
- Zero Energy State (Lock Out)
